

Coporate

For more than 30 years, MATRIX VISION has represented an innovative and trustworthy partner in the image processing market.

Based on many years of experience as a vision pioneer, we are paving the way for our customers for new high-tech future solutions. As a result, we include our customers in an early stage of development and incorporate your future demands into the new product. Along with our partners, our know-how, and the high quality of our services, we play an active role in the image processing market.

Uwe Furtner, General Manager

The needs of our customers are the main focus of our thoughts and actions. Our employees are passionate about realizing the wishes and demands of our customers. That creates the basis for reliable and long-standing partnerships with the highest level of customer satisfaction.

Image processing solutions from one single source – the MATRIX VISION product range.

Recognition, acquisition and processing – our digital cameras families mvBlueFOX and mvBlueCOUGAR, as well as our smart cameras mvBlueLYNX and mvBlueGEMINI are very compact and meet current industrial standards. Our frame grabbers with analog, digital or CameraLink interface process very high data rates. The software solution mvIMPACT Configuration Studio for applications such as measurement, OCR/OCV, as well as pattern, barcode, data matrix, object, and color recognition optimally supports our hardware components.

Our customers appreciate the extensive product range of MATRIX VISION, as well as the customized solutions. From low-cost to high-tech – we develop the best solutions for all demands.

Benefit from our service:

- Highest quality standards and long-term product availability
- Product features with high added value for our customer
- Efficient solutions through modular array of products

- Investment protection through standards and open interfaces, whenever possible
- With 600 years of overall developer experience we are trendsetters and promote innovations
- Custom modifications and developments – not only for high-volume projects

Made in Germany:

In 1986, the company was founded by Werner Armingeon and Gerhard Thullner. With a current staff of 100 employees, we develop, support, and distribute our extensive range of products worldwide.
