

## Compact protection class POE-IP67C

02-12-2019 12:45

With the option IP67C - C for compact, there is a cost-effective and waterproof model of the mvBlueCOUGAR-X industrial camera. The camera offers industrial grade connectors and the waterproofness is integrated within the standard housing. For the tightness of the lens there are two possibilities. You can use either

- a standard lens with a max. diameter of 40 mm in combination with a protective tube, which we offer in different lengths (54 mm, 83 mm, 100 mm) or
- a waterproof IP67 lens from Kowa, which we added to our portfolio ([BAMLS-VS-008 series](#)).
