

Our partners for image processing accessories

Telecentric optics

_ Opto Engineering

Founded in 2002, Opto Engineering is one of the leading and one of the most innovative manufacturers of optical products for the industrial image processing. Telecentric lenses are the core business of Opto Engineering. For decades these lenses have been optimized by progressive research and development, so that today they can offer a wide range of products for a multitude and still growing number of applications. Because of subsidiaries in Europe, North America, China and Korea, product support and availability is guaranteed throughout the world.
