

## **New professional articles from MATRIX VISION**

11-09-2008 12:00

In July/August two professional articles from MATRIX VISION were published with following topics:

- **"Traffic Participants at a Glance"** (GIT Inspect 03/2008)  
Since 2005 in France the intelligent camera [mvBlueLYNX](#) is used for traffic surveillance on motorways and waterways. Since then the road safety was improved. Read more in the [article](#).
- **"Smart cameras aid sewing"** (Vision Systems Design Jul. 2008)  
In the textile an increasing number of industrial image processing comes into operation. Read more about this in the [article](#).
